

AMENDMENTS TO THE DRAWINGS

Replacement drawing sheets 1/8, 2/8, 3/8, 4/8, 5/8, 6/8, 7/8 and 8/8 that include Figs. 1-8d, respectively, are attached. The labeling has been replaced in all of these figures, and Figures 2c-2d and 6c-6d have been clarified to overcome the present objections to the drawings. Arrows have been added to show the direction of airflow in Figs. 2c, 2d, 6c, and 6d, and cross-hatching has been altered to distinguish the primary valve 42 from the trigger 44.

REMARKS

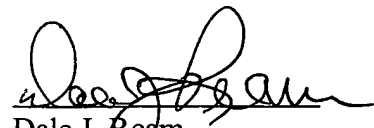

This is in full and timely response to the Office Action on the merits dated January 28, 2005. Reconsideration and reexamination are respectfully requested in view of the foregoing amendments and the following remarks.

Claims 1-12 and 15-20 have been allowed and are the only claims pending in the application.

IN THE DRAWINGS:

The drawings are objected to as not showing every feature of the invention specified in the claims. Since the examiner has reviewed a draft of Figs. 2c, 2d, 6c, and 6d (sent by Justin Poplin, Pat. Reg. No. 53,476 on 11 February 2005) and found the present objections of the drawings to be overcome, this application should now be in condition for allowance and such is respectfully requested. If the examiner has any suggestions that would place this application in even better condition for allowance, he is invited to contact the applicant's representative at the telephone number listed below.

Respectfully Submitted,

Dale J. Ream
Patent Reg. No. 45,798

Date: February 24, 2005
